

# Enhanced Codling Moth Larval Control!

For conventional and organic apples and pears!!

# DECREASE DAMAGE

40% Average Reduction Compared to Insecticide Alone\*

Simply tank mix with insecticide application

“ CIDETRAK DA MEC will provide a higher level of insecticide efficacy in killing hatched larval worms and protecting the fruit set, that you, the grower now sees and counts on. May kicks off the pomefruit spray season targeting the Codling Moth 1st and 2nd flights as key to control. ”

~ Dr. Douglas Light, USDA-ARS, Emeritus

Available in 10, 20 and 40 acre container sizes!

**CIDETRAK® DA MEC™** contains a novel, patented kairomone in a micro-encapsulated liquid formulation that influences the behavior of adult and larval Codling Moth, **resulting in significant enhancement of the control of Codling Moth larvae** when tank mixed with various insecticides. **Additionally**, Codling Moth adult control is significantly enhanced when mixed indirectly with airborne Codling Moth pheromone applied as a mating disruption treatment.

- **What it does:** Disrupts oviposition. Changes larval behavior: Stops/delays locating fruit; stops/delays fruit entry and reduces damage.
- **How to use it:** Simply tank mix with each insecticide application.
- **Longevity:** More than 14 days following application.
