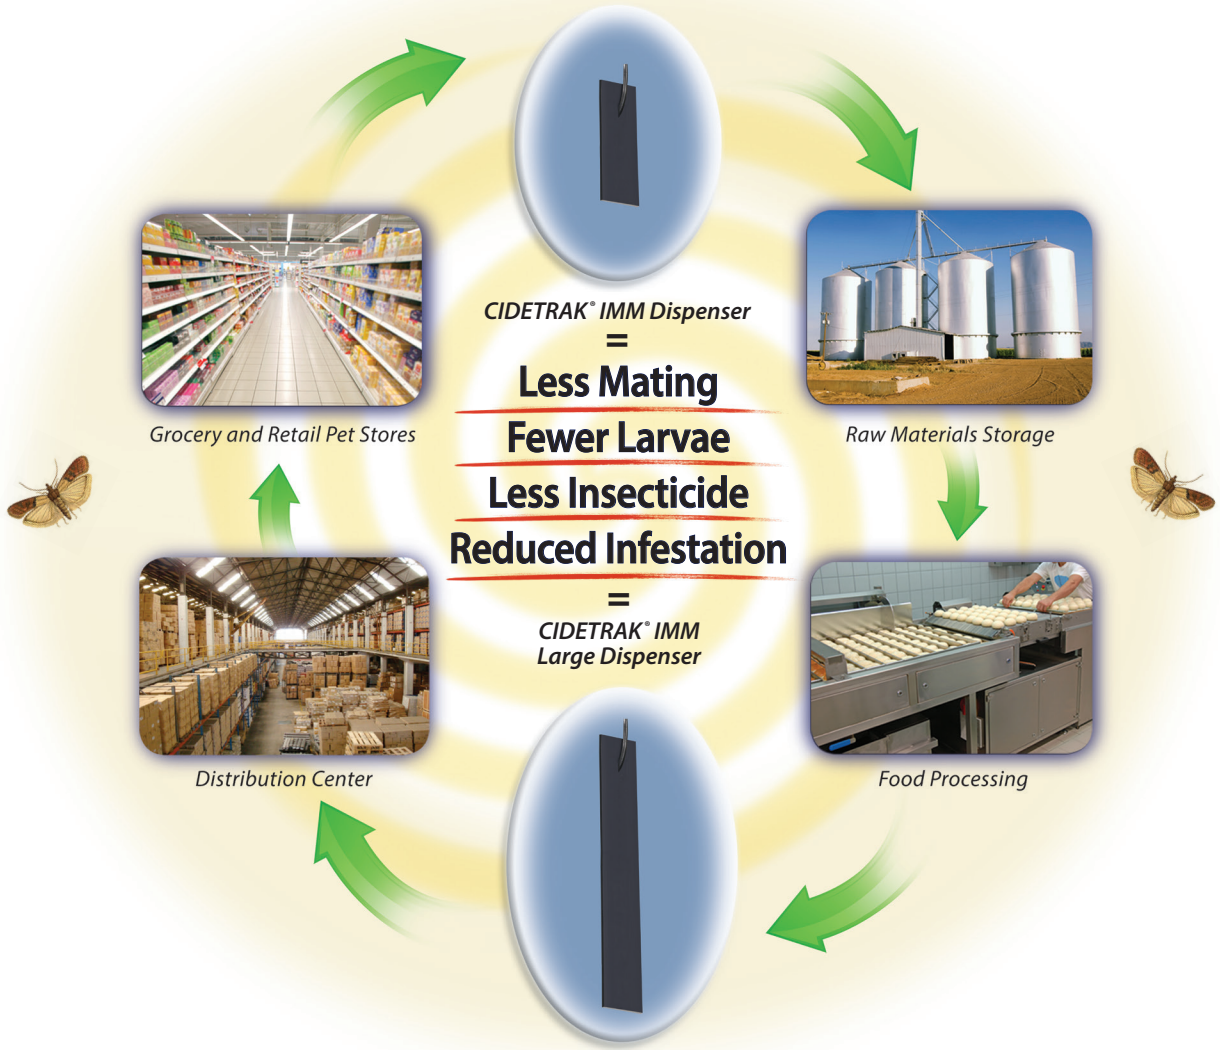
CIDETRAK® IMM

MATING DISRUPTANT FOR INDIANMEAL MOTH

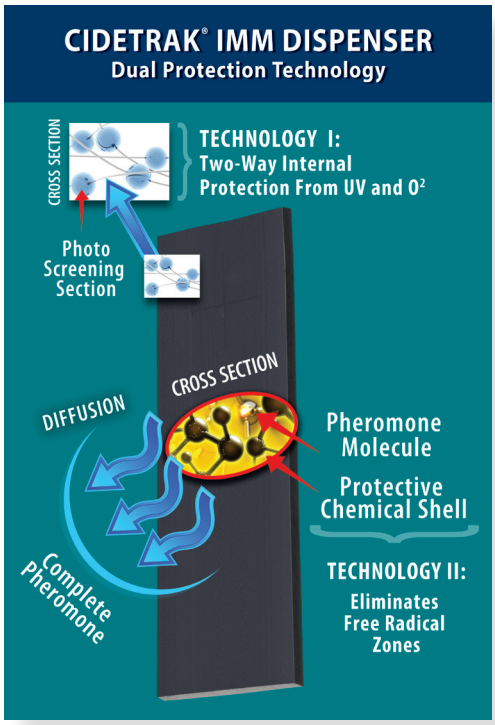
The Most Effective Moth Control Product available on the market today!



Broad Spectrum, Non-Toxic, No Residue, Fits Every Market Segment,
Low Cost, Long Lasting, Full Season Protection

Insect mating disruption is extensively used in global agriculture.

*At Trécé we are proud to bring this proven technology and our latest technological concept in integrated pest management, the **NEW CIDETRAK® IMM**, an intelligently simple high performance dispenser for Indianmeal Moth mating disruption. Designed to prevent mating, by sending Indianmeal Moths into a state of confusion - the male cannot find the female.*



Features:

- *Prevents mating*
- *3-way effect on mating*
- *Often more effective than insecticides over time*
- *Continuous preventative strategy*
- *Broad spectrum for many moths*
- *Works in multiple environments*
- *Non-toxic*
- *Reduces toxic insecticide use*
- *Reduces frequency of toxic space treatments*

Benefits:

- *Reduces or eliminates larvae and populations*
- *False trail following, trail masking and antennal overload*
- *Cost effective insect management*
- *24-7 results*
- *One easy application; economical*
- *Flexible and effective for sensitive users*
- *Less interruption from plant shutdowns for insect control*
- *Reduced worker and consumer concerns*
- *Less interruption, labor cost savings, less residue*

Commodities/Facilities:

Storage:

Birdseed storage & packaging
Cocoa bean storage
Coffee bean storage
Dry bean storage
Grain storage
Peanut and other Nut storage
Popcorn storage & packaging
Spice storage & packaging

Food Processing:

Chocolate/confectionery manufacturing
Cereal & Baked goods manufacturing
Pasta manufacturing
Pet food manufacturing
Other food processing manufacturing

Distribution Centers:

Retail

Retail Stores:

Grocery and Pet

Insects:

- **Indianmeal Moth,** *Plodia interpunctella*
