Stanislaus County	CM	(Walnuts, Central Stanislaus Co.) – F1 Biofix 6/20, 985DD.
	NOW	(Almonds, Central Stanislaus Co.) – F1 Biofix 6/25, 723DD.
	PTB	F1 Biofix 6/20, 985DD. <i>Note: Brown Marmorated Stink Bugs being trapped in peach and almond orchards in Stanislaus County, information from local Area IPM Advisor Jhalendra Rijal.</i>
San Joaquin County	CM	(Walnuts, Linden) – F1 Biofix 6/17, 953DD.
	NOW	(Almonds, Escalon) – First eggs 4/12, 1743DD. Egg counts increasing.
	OFM	(Stonefruit, Escalon) – F2 Biofix 6/27, 908DD.
	PTB	F1 Biofix 6/14, 1132DD.
Sacramento County	CM	(Apples, Delta) – F1 Biofix 6/12, 1007DD.
	OFM	(Apples, Delta) – F2 Biofix 7/1, 883DD.
Sutter County	CM	(Walnuts, Yuba City) – F1 Biofix 6/12, 1142DD.
	NOW	(Almonds, Yuba City) – F1 Biofix 7/1, 584DD.
	OFM	(Peaches, Yuba City) – F3 Biofix 7/12, 555DD.
	PTB	(Almonds, Yuba City) – F1 Biofix 7/4, 640DD.
Butte County	CM	(Walnuts, Gridley) – F1 Biofix 6/12, 1180DD.
	NOW	(Almonds, Gridley) – F1 Biofix 7/1, 605DD.
	OFM	(Peaches, Gridley) – F3 Biofix 7/12, 570DD.
	PTB	(Almonds, Gridley) – F1 Biofix 7/4, 607DD.
Glenn County	CM	(Walnuts, Willows) – F2 Biofix 7/28, 52DD.
	NOW	(Almonds, Willows) – F1 Biofix 7/6, 538DD.

BMSB= Brown Marmorated Stink Bug, CM = Codling Moth, OFM = Oriental Fruit Moth, PTB = Peach Twig Borer, CRS = California Red Scale, SJS = San Jose Scale, NOW = Navel Orangeworm, OLR = Omnivorous Leafroller

NOTE: The foregoing is supplied as a general information guideline only. This information is specific to the site location listed and collected by highly qualified PCA/Consultants. For optimum pest management decision making, each orchard should be individually monitored with pheromone traps and environmental monitoring equipment.

Mark your calendars for the action date listed below:

AUGUST: All **PHEROCON®** traps should be placed in the orchards.

New Products: **CIDETRAK® NOW MESO™** Mating Disruptant for NOW control in conventional and organic California tree nuts: almonds, pistachios, figs and walnuts.

The third flight of Navel Orangeworm is almost here and hull split is upon us, BUT IT'S NOT TOO LATE to apply **CIDETRAK® NOW MESO™** to obtain significant economic benefit from protection of hull split this year and a high probability of reducing mummy infestations, which will affect the crop next year. **CIDETRAK® NOW MESO™** has been shown to provide excellent results in replicated trials with delayed applications through July. **CIDETRAK® NOW MESO™** is easy to use, contains no moving parts, no batteries and no gummy deposits, which I'm sure your growers will appreciate.

And, remember, **CIDETRAK® DA MEC™** enhances Codling Moth larval control when mixed in the spray tank with insecticide in conventional and organic walnut orchards.

Dr. Douglas Light, USDA-ARS, Emeritus, "CIDETRAK DA MEC provides a higher level of insecticide efficacy in killing hatched larval worms and protecting the walnut set that the grower currently sees, and counts on, by targeting the Codling Moth 1B, 2nd and 3rd flights. This also adds the benefit of decreasing damaged-nuts for NOW to later infest."
