MARCH: CM, CM-DA COMBO, DA, CM 10X, CRS, DBM AND PTB traps should be set.

APRIL: OBLR and OBLR-W traps should be set.

Tréce is pleased to announce the release of a new, more effective PHEROCON® OFM L² monitoring lure this season! And, be sure to use Tréce's CIDETRAK® CM and CIDETRAK® OFM-L Mating Disruptant products. These intelligently simple, high performance dispensers for Codling Moth and Oriental Fruit Moth mating disruption are designed to deliver long-lasting performance with remarkably fast application. PHEROCON® CM-DA COMBO multi-gender attractant for monitoring will give you a definite edge in your battle against the codling moth, your toughest competition. This lure has been proven to be the most effective codling moth lure on the market today. For more information on CIDETRAK or CM-DA COMBO lures, and how to interpret data from trap capture, contact Jeff Downs, National Sales Manager, at 559-285-8448.

The IPM PARTNER® Field Reporter™ will also be published on our website www.trece.com
