Yuba County (Marysville): **CM** – F3 Biofix 8/18, 208DD. **OFM** – F4 Biofix 8/19, 228DD.

We are pleased to announce the introduction of Trece's new PHEROCON® Spotted Wing Drosophila, Drosophila suzukii, monitoring lure and trap. The PHEROCON SWD lure provides significantly higher capture rates at least 2 weeks earlier than natural bait products currently in use. And, the PHEROCON SWD lure captures fewer non-target insects when used with either natural baits (such as apple cider vinegar) or neutral drowning solutions (such as antifreeze or soapy water). The controlled release lure lasts up to 30 days. Please contact Trece, Inc. at (918)785-3061 or your local distributor to place an order today!

PHEROCON® CM-DA COMBO multi-gender attractant for monitoring will give you a definite edge in your battle against the codling moth, your toughest competition. This lure has been proven to be the most effective codling moth lure on the market today. For more information on CM-DA COMBO lures, and how to interpret data from trap capture, contact Trece, Inc. at (918)785-3061.

The IPM PARTNER® Field Reporter™ will also be published on our website www.trece.com
